

# Meditation for Global Positive Change®

There is peace throughout the planet.

The air all across the globe is pure, fresh and clean.

The waters flowing through our lakes, rivers and oceans is crystal clear and carries only the natural elements and life it was intended to hold.

The soil under our feet, everywhere, in every country, is alive with natural nutrients, and life springs freely from its bountiful depths.

The creatures of the earth abound in glorious diversity and great numbers.

Healthy, sustainable processes are now in use, for all our needs, including energy and fuel, food production, and all manner of required consumables.

The human race has turned massive knowledge and resources towards the health of the planet, and people everywhere are *doing good with what we know*.

**Think the above scenario. Visualise it.  
Act in the direction of the above. Attract It.  
Pass it on. There is no time to waste.**
